Shuttle Shelter

JCDecaux Airport

08/11/2022

Technical Specifications

Files

- File with a final resolution of 300 dpi at size 1/10
- The texts must be vectorized
- CMYK only, no RGB

High resolution PDF files (300 dpi, version 1.5 or lower), scale 1:10, containing a 5 cm bleed area in accordance with the available templates.

PDFs generated from Adobe Illustrator are also acceptable with presetting [Illustrator as default].

All costs arising from deliveries of non-compliant files and/or post-delivery client corrections will be borne by the client.

Files

Final files have to be sent in PDF format, by mail or using Wetransfer to mbt-air@jcdecaux.com

Technical Specifications

Print area: For images with bleed (if the background shown in the visual is not white), the print area must be complied with.
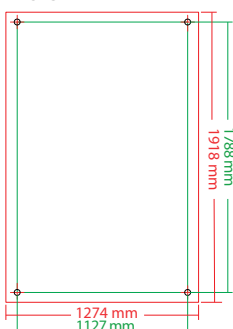

Visible area: Area where all the information can be seen or partly seen on the edges of the poster (frame + significant)
